Date 17 March 2023

Example wallet and epicbox Slate receive by wallet using protocol 2.0.0.

Wallet: Connect to epicbox

Ebox: Send **Challenge** message

{type:"Challenge", str:"……"}

Wallet: Send **Subscribe** message

{type:"Subscribe", ver:"2.0.0", address:"….", signature:"….."}

Ebox (in loop finding if exist new Slate in RabbitMQ queue for wallet address): Send **Slate** message

{type:"Slate", epicboxmsgid:"…..", ver:"2.0.0", str:"…", from: "…", signature:"…", challenge:"..."}

Wallet (after use slate): Send **Made** message

{type:"Made", ver:"2.0.0", epicboxmsgid:"…", signature:"…", challenge:"", address:"..."}

Ebox remove slate from RabbitMQ queue.
